inks

BIC® brand ink cartridges undergo a toxicological review by the Duke University Medical Center under the WIMA (Writing Instrument Manufacturers Association) certification program. Duke University bases its review on the guidelines set forth by the CPSC (U.S. Consumer Product Safety Commission). Many of our highlighter and marking inks are also certified by the Art and Creative Materials Institute, Inc. (ACMI) as non-toxic.

Our ink cartridges are analyzed to test shelf life and write-out times.

Components of BIC® cartridges are produced by the highest-quality cartridge manufacturers from all over the world. Points are made of stainless steel, brass or nickel silver. Balls are made of tungsten carbide, which contributes to consistent writing.

what it means

There's so much to learn!

BPA-Free

Items that have been successfully tested for compliance.

Hot & Cold Hours

Indicates the number of hours a beverage container will maintain liquids hot or cold, based on our quality testing.

Leak-Proof

Does not let any liquid out when completely turned upside down. Perfect for gym, suitcase/bag ready.

Sweat-Proof

Does not show any condensation. Keeps your hands dry.

Spill-Resistant

Has a lid mechanism that prevents big spills should the cup tip. Perfect for on the go, travel mug kept in hand or on desk.

Tritan® Material

Tritan® from Eastman is a durable, clear, BPA-free plastic with a clear glass-like look and feel. It is a tough plastic that retains its color and gloss even after hundreds of dishwasher cycles.

Stainless Steel with Inner Copper

These 2 metals are very efficient together. The combination of both helps to maintain liquids hot or cold longer than regular stainless steel.

Stainless Steel 18/8 Grade

18% Chromium/8% Nickel, also known as 302 or 304 grade stainless steel. Chromium binds oxygen to the surface of the product to protect the iron from oxidation (rust). Nickel enhances the corrosion resistance of stainless steel.

Aluminum

More lightweight than other metals and looks similar to stainless steel.

PET (Polyethylene Terephthalate)

PET plastic is used to manufacture many common household items, and most bottles are made from this material. PET has an excellent level of wear resistance compared to other plastics.

how it's made

In many containers, heat or cold finds its way in and out through convection. Containers with vacuum insulation creates an airless space between the walls. This stops the convection process, which eliminates any change in temperature and allows your beverages to remain icy cold or steaming hot longer.

a case study

Client: bioenergy company

Purpose: workforce gift packages

A bioenergy company was building employee gift packages that would appeal to their entire workforce during the COVID-19 public health crisis. With employees working both at home and continuing to work in the field, they wanted to provide items that would be useful in a variety of situations. The company included the #46178 Koozie® Hartwell Vacuum Tumbler - 20 oz. in their gift packages because of features like the screw-on, leak-proof lid and double-wall copper vacuum insulation that made it perfect for the home office or for on the go. The modern, matte black finish with pops of color on the lid and a full-color imprint showed off their logo and a message of positivity during the uncertain time.

Client: local pub

Purpose: loyalty program

When a pub had to temporarily close due to coronavirus, the owner wanted a way to connect with his loyal customers in a memorable way. He created a direct mail campaign that included a #45667 Koozie® Coaster imprinted with his logo, contact information and the message "Don't you worry, mate! Your barstool is still here!" The mailing was sent to customers in his loyalty program who were encouraged to bring along their coasters when the pub reopened to receive a free drink.

Client: university

Purpose: brand awareness

After refreshing their brand identity, a university music program was looking for a fun and unique promo to include in their new student welcome packs. They were impressed by the durability and modern design of the #32401 Koozie® Fabric Waterproof Bluetooth® Speaker. The welcome gifts were well received by students who also used the speakers during lessons, practices and rehearsals.

a case study

Client: car dealership

Purpose: car detailing checklist

The service department at a car dealership wanted a contact-free way to let customers know their vehicle had been cleaned and sanitized after service. Using the #P3A3A50 BIC® Sticky Note™ 3" x 3" Adhesive Notepad, 50 Sheet Pad, the dealership created a checklist outlining the sanitation steps that were taken prior to turning vehicles back over to their owners. After the cleaning process, employees marked off the boxes on the list then stuck the note to the steering wheel. The checklists satisfied the need to communicate enhanced safety measures while maintaining social distancing. The dealership received positive feedback from customers who appreciated their extra efforts for safety and transparency in an uncertain time.

CALENDARS

Koozie Group offers a collection of 40+ brands you love, across 10+ categories.

calendars defined

Discover **ALL** the options a calendar has to offer.

1 Stapled Binding

Choose stapled binding, also called saddle stitching, for an economical version of a calendar that is also perfect for direct mail.

2 Spiral & Twin Loop Binding

These types of binding provide a polished look and are great when you want your calendar to lie flat.

3 Tinning

Large commercial calendars can take a beating. Tinning, a process of crimping pages of a calendar with a metal strip, adds durability and keeps your calendar hanging neatly.

4 Window Ad

A window ad prints in the middle of the calendar, putting your message at the center of attention.

5 Drop Ad

A drop ad spans the bottom of a calendar, providing a large area for your brand's message.

6 Insert Pages

Want to add coupons or a message to your customers? Use insert pages to make your calendar more than a tool for keeping track of appointments.

7 Backmount

The last page of the calendar—or the backmount—is another place to include information valuable to your customers. Choose from over 15 different stock themes or create your own.

8 Personalization

Go the extra mile and make your customers feel special. You can print individual names on each calendar.

9 QR Code

QR codes are a kind of barcode that can be read by many mobile devices. Use them to put instant information, like special offers or company information, in the palm of your customer's hand.

10 Phantom Overprint

A screened-back version of your logo or other special design can add interest to your calendar's date grid.

11 Date Block Overprint

Go beyond the typical holidays. You can note company closures, special deadlines, or corporate facts on your calendar.

12 Augmented Reality

Bring your calendar to life with Pixaction 2.0. Using a free app, you can launch videos and other media right from the calendar's image.

a case study

Client: travel agency

Purpose: shift focus to domestic travel

A travel agency shifted their focus to domestic travel due to international restrictions during COVID-19. They chose to include a #1710 National Parks Calendar in their annual mailing to showcase beautiful scenery that is found within the United States. In the quarter following the mailing, the agency saw a 27% increase in domestic travel inquiries and overall bookings remained steady with the same months in the prior year.

Client: regional advertising competition

Purpose: awards banquet

A regional advertising competition moved their annual awards banquet to a virtual event but wanted to be sure that winners still felt recognized and appreciated for their efforts. They wanted an acrylic award option that could be shipped with less breakage concerns - but was still impressive. They selected the #36678 JAFFA® Acrylic Plaque because of the full-color imprinting capability on both front and back so the award's design achieved a stunning 3D effect. Plus, the free-standing style matched their modern aesthetic and could be easily packaged for shipping.

a case study

Client: brokerage firm

Purpose: increase traffic through community engagement

A real estate brokerage sponsored a summer “’80’s movies on the lawn” series in their local community. As part of their sponsorship, they got to choose one week’s movie and provide a giveaway to moviegoers that evening. The brokerage showed, “The Money Pit” and partnered with a local home inspection company to giveaway #40512 Frosty Stripe First Aid Kits. They also inserted a brokerage business card and home inspection coupon inside each kit. Both businesses reported an increase in customer inquiries after the event and coupon redemptions exceeded the inspection company’s projections.

Client: campsite and resort chain

Purpose: employee appreciation

A nationwide campsite and resort chain wanted to show appreciation for employees after an exceptionally busy year. Each employee was gifted a #21143 Leatherman® Wingman® along with their annual holiday bonus as an extra token of gratitude. Afterwards, corporate headquarters was thrilled to see an uptick in social media engagement after being tagged in photos of the gift, as well as noticing an increase in their company score on a popular job recruitment site.

From affordable keychains to high-end automotive accessories, we offer a mix of exclusive products and branded partners like Leatherman® to **fulfill all your promotional and advertising needs**. Almost half of our products are Good Value™ brand — a great value at a competitive price! In addition, many items are available with full-color imprinting.

All Leatherman® tools are built and manufactured in the USA. These tools are reliable for any adventure or task, big or small

Tim Leatherman built his first multi-purpose tool in Portland, Oregon, in 1983. Today, the Leatherman® brand is synonymous with quality craftsmanship and innovation.

Client: nonprofit

Purpose: attendee gift

When a nonprofit had to cancel their annual fundraising dinner due to coronavirus, a golf course donated their clubhouse patio and practice putting green for a socially distanced, outdoor event. The organization held a putting contest, silent auction and outdoor happy hour and drew more attendees than the previous year's gala. In return for the donated space, the nonprofit included a #60082 Two Ball Pillow Pack - Titleist® TruFeel imprinted with the golf course's logo and a course brochure in attendees' gift bags.

shirt alert yarn & fiber terms

CARDED YARN (KP)

A cotton yarn that has gone through a cleaning process that leaves a wide range of fiber lengths. Carded yarns are not as uniform as combed yarns.

COMBED YARN (CP)

A cotton yarn that contains straighter and longer fibers for better uniformity and strength. An additional "combing" step is conducted on carded yarn to extract foreign matter and fibers shorter than 1 1/8". This results in a smoother and more unified yarn.

COTTON

A natural fiber that grows in the seed pod of a cotton plant. Fibers are typically 1/2" to 2" long. The longest staple fibers produce the highest-quality cotton fabrics.

NYLON

A manufactured fiber known for its strength and excellent resilience, nylon has superior abrasion resistance and high flexibility.

OPEN-END SPUN (OE)

Created through a spinning process that blows cotton fibers into a rapidly spinning turbine that wraps the fibers around themselves. OE Yarn is spun at exceptionally higher speeds than Ring Spun yarns, which results in a lower-cost yarn.

ORGANIC COTTON

Cotton that is grown without the use of toxic pesticides and synthetic fertilizers.

PIMA COTTON

A premium cotton that has very fine, strong, and long fibers, which makes for a superior fabric with lustrous appearance and soft hand.

POLYESTER

A manufactured fiber introduced in the early 1950s, polyester provides high strength, excellent resiliency, high abrasion resistance and rapid drying.

RECYCLED POLYESTER (PET)

PET is the abbreviated name for Polyethylene Terephthalate, the polymer used to create plastic soda bottles. Recycled soda bottles can be processed and converted into polyester fibers that are knit into apparel fabrics.

RING SPUN (RS)

Created through a process of spinning that continuously twists and elongates the cotton fibers into a single strand of yarn. The ring spun process yields a noticeably softer, stronger and more durable cotton yarn that is primarily used in premium apparel.

SPANDEX

A manufactured elastomeric fiber that can be repeatedly stretched without breaking and still recover to its original length.

YARN COUNT

Often referred to as "singles". The number of "hanks" of yarn it takes to create 1 pound of yarn. One hank is about 840 yards long. If it takes 30 hanks to create 1 pound of yarn, then a single yarn from this would be read as 30/1 (thirty singles). The higher the yarn count, the finer the yarn. For example, a 30/1 yarn is a finer yarn than a 20/1 yarn. A finer yarn typically produces a tighter stitch density and a lighter-weight fabric.
