# calendars defined

Discover the options a calendar has to offer.

### 1 Stapled Binding

Choose stapled binding, also called saddle stitching, for an economical version of a calendar that is also perfect for direct mail.

### 2 Spiral & Twin Loop Binding

These types of binding provide a polished look and are great when you want your calendar to lie flat.

### 3 Tinning

Large commercial calendars can take a beating. Tinning, a process of crimping pages of a calendar with a metal strip, adds durability and keeps your calendar hanging neatly.

### 4 Window Ad

A window ad prints in the middle of the calendar, putting your message at the center of attention.

### 5 Drop Ad

A drop ad spans the bottom of a calendar, providing a large area for your brand's message.

### 6 Backmount

The last page of the calendar—or the backmount—is another place to include information valuable to your customers. Choose from over 15 different stock themes or create your own.

### 7 Personalization

Go the extra mile and make your customers feel special. You can print individual names on each calendar.

### 8 QR Code

QR codes are a kind of barcode that can be read by many mobile devices. Use them to put instant information, like special offers or company information, in the palm of your customer's hand.

### 9 Phantom Overprint

A screened-back version of your logo or other special design can add interest to your calendar's date grid.

### 10 Date Block Overprint

Go beyond the typical holidays. You can note company closures, special deadlines, or corporate facts on your calendar.

Not all options are available on all calendar styles.
